CitySense Plus

Installation Manual

ATTENTION:

In order to function properly, CitySense Plus must be connected to a dimmable driver/ballast.

NOTE: Some dimmable drivers/ballasts must be programmed/set to dimmable mode. If this has not been done, CitySense Plus will not be able to dim the connected armature.

In box:

CitySense Plus

Sticker

M16 Cable Gland

OR

20 mm Rubber Grommet

5m Cable

You'll need:

Drill

Generic Strap x 2

Max = 11mm
Min = 8mm

Scan&Go App

Available in the
Apple App Store
and in the
Google Play Store

M16 Thread

Wago x 4

1. Run wire through Cable Gland/Grommet

2. Drill hole into the pole:

- M16 threaded (Cable Gland) OR
- 20 mm (Grommet)

Note: for added protection against rust, the use of an anti-corrosion spray such as WD40 Corrosion inhibitor or equal is recommended.

3. Run wire through hole in the pole

4. Insert Cable Gland/Grommet into hole in the pole

5. Screw Cable Gland OR press Grommet into the pole

OR

6. Strap product to the pole

Tensioning Tool

* Ensure Tensioning Tool is set to maximum tension (#4)

7. Level the product

8. Apply product ID sticker to pole

9. Add device to CityManager

1. Download Tvilight Scan&Go from Apple iOS App Store or from Google Play Store.
2. Login with your Username and Password.
3. Use the 'Add device' function in Scan&Go app to add the device to CityManager.
4. The location of the new device is determined by Scan&Go's GPS and it will be indicated on the map.
5. The Device Serial Number will be added when scanning the QR-Code with the camera.
6. Fill in the required fields (the ones with an asterisk), select the device type and also **select the type of ballast** (PWM or DALI-Logarithmic or DALI-Linear).

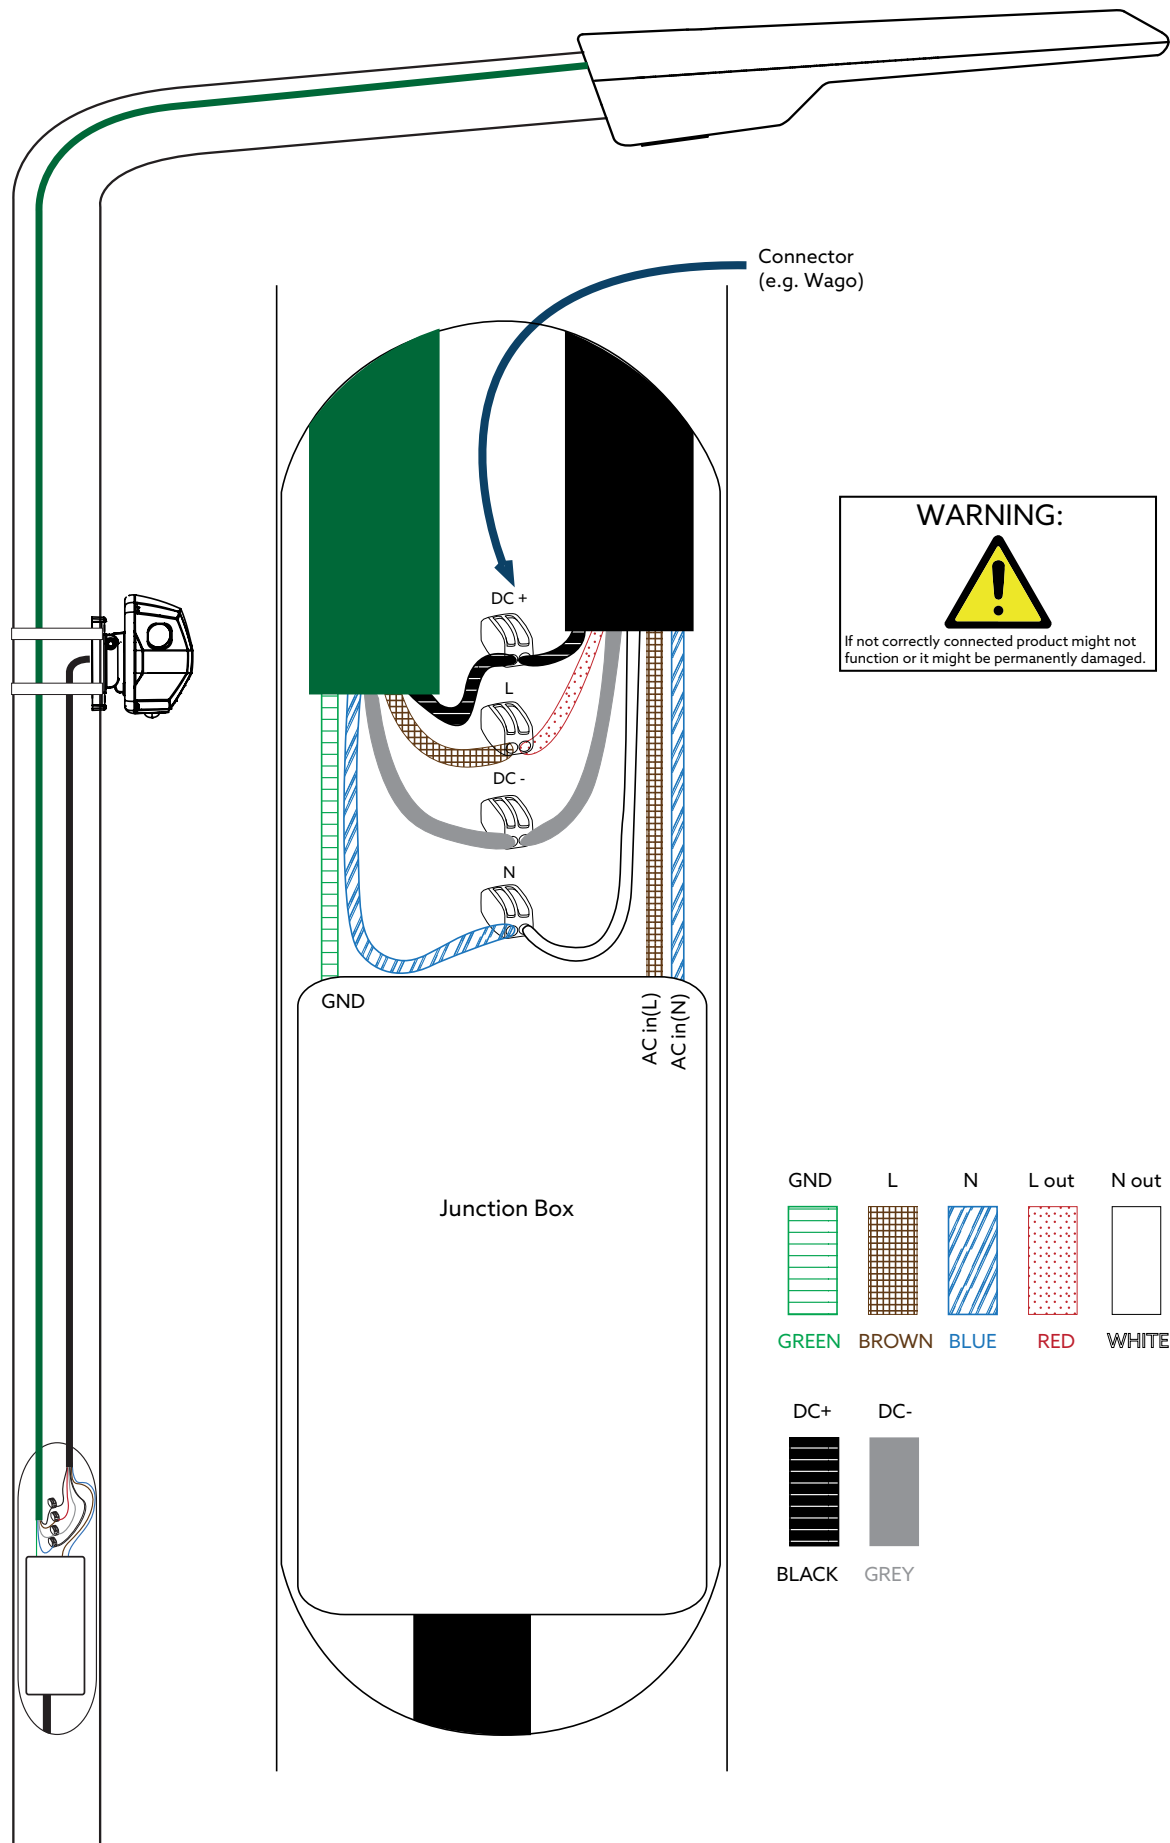

Note: The type of ballast must be known before installation.

7. Press save and move to next device.
