Why invest in Smart Streetlights?

60% - 80% Energy Savings

Dimming streetlights with pre-defined schedule and smart sensors significantly cuts energy waste.

Predictive Maintenance

Proactive alerts / notifications for faults, alarms or outages optimise maintenance and substantially reduce operational costs.

Total Infrastructure Control

Connected streetlights enable remote monitoring, management and control of complete citywide infrastructure.

Why invest in Smart Streetlights?

Foundation for Smart City

Standardised interface and Open APIs support inter-connectivity with applications such as traffic lights, security systems, etc.

50% Lower Light Pollution

Dimming streetlights during off-peak hours or through motion sensors significantly cuts light pollution.

Improved Public Safety

Right light and right place and right time enhances citizens' sense of safety.

Why invest in Smart Streetlights?

Address Climate Change

Fine-tuning lighting levels on need-basis dramatically reduces carbon emissions.

Protect Flora and Fauna

Autonomous dimming during off-peak hours lower lighting pollution and benefits local flora and fauna.

Benefits from Day One

Unlike other smart city solutions, deploying smart lighting deliver benefits from day one!

Specialist in Smart Outdoor Lighting

We enable cities to take full control of their Lighting Infrastructure based on Open Standards

TVILIGHT

Global Presence: Smart Streetlights Operational Across 1000+ Cities

Monitored & Managed by CityManager and Supported by Tvilight Service Desk

Selected Smart Street Lights Projects (individual level monitoring & control)

- Dortmund (DE) 44.000+
- Dutch Railways (NL) 10.000+
- Odos (GR) 10.800+
- Luxembourg City (LU) 9.000+
- Helmond (NL) 10.000+
- Jaipur (IN) 7.500+
- Chattogram (BD) 7.500+
- Seoul (KR) 4.000+
- Indonesia (ID) 2.000+
- Sohar Port + Muscat (OM) 1.500+

Smart Lighting Solutions

Solution Portfolio

Light Management Platform

- CityManager
- LightSwitch
- Scan & Go
- CityMonitoring

DigiHub

- Data & Analytics
- Security & Backups
- Open API TALQ 2.0

Services

- Training
- Service Desk
- Engineering & Commissioning
- Project Based Software Development

Lighting Controls

RF Mesh

- CitySense Plus Motion Sensor
- SkyLite Prime RF
- SkyLite RF
- CitySense Lite Motion Sensor

IoT

- OpenSky NEMA
- OpenSky Zhaga
- OpenSky NEMA IoT Plus
- OpenSky Zhaga IoT Plus
- CitySense IoT

Group

- City Cabinet Lite
- Panel Gateway

Existing Products | Under Development | 3rd Party Products

Smart Lighting with Secure IoT Network

DigiHub
Database and Analytics

Internet

LTE CAT 1 (4G) / GSM/GPRS

CityManager
CMS dashboard

Wireless Smart Lighting

- Open Standard Cellular Network
- LTE CAT 1 (4G) and GSM/GRPS connectivity
- No local gateway needed
- Highest security standard regulated by 3GPP

TVILIGHT

Zhaga IoT Street Light Controller

- Remotely **monitor, manage** and **control** citywide streetlights

- **Plug & play installation** through standardized Zhaga book 18 socket and auto-commissioning system

- Connects directly to local **secure cellular network**

Zhaga ZD4 DALI 4G LTE

CE EAC UK CA RoHS IP66 IK09

Luminaire Agnostics, Vendor Neutral Solution

Freedom of Choice

- Select lamp fixtures from any suppliers / manufacturers.

- Prevent vendor lock-in. For example, fixtures from vendor 1 for main roads, while vendor 2 for the residential areas.

- Seamlessly connect and control any LED streetlight fixture / luminaire.

Global Standard, Local Network
Lamp connects directly to local cellular tower

- Highest available security (3GPP)

- Fully managed network by local telco

- Excellent network uptime

- Automatically selects the best signal and the best operator: LTE Cat 1 (4G) or GSM/GPRS

- Long range, deep coverage

Gateway Free Installation

CITY MANAGER

Light Management Platform

Devices communicate directly with LMS

- Full control over individual streetlights

- Eliminates cost and hassle of installing and maintaining multiple gateways

- Live dimming / switching response

Auto Commissioning, Easy Deployment

GPS

GLONASS

GALILEO

QZSS
In-built GPS activates device

- True plug-and-play installation

- Device geo-locates automatically upon power, and auto-registers to your LMS

- Eliminates entire network engineering efforts

Point Level Control at Your Fingertips

CITY MANAGER

Pole 038
Manage each light individually

- Switch or dim each luminaire using custom light scenes

- Set different light levels for main roads, traffic junctions and zebra crossing.

- Maintain flexibility to adapt light profile to future city needs.

- Receive meaningful alerts and insightful data of every street light

Adjust Street Light Colours

Create the right ambience

- Choose from a broad spectrum of colours or any shade of white to find the right tone (RGBWAF) thanks to native support for colour control (DALI Part 209, DT8)

- Adjust colours based on:

  - Profiles

  - Specific days

  - Certain events

  - Human movements (motion sensing)

** Currently works with OpenSky IoT Controllers*

Finer Control Over Dimming & Switching

Regulate light levels as situation demands

- Photocell

- RGBW (through multi-addressable DALI, DT6, DT7, DT8 drivers)

- Twilight (Photocell / Ambient Light Sensor)

- AstroClock (Astronomical Clock)

- Time-based Light Scene

- Calendar-based Schedules

- Central ALS (Photocells in City)

- Adaptive (Motion Sensor)

- Autonomous Mode

TVILIGHT

Standardised Interface, Luminaire Agnostics

Twist to Lock

Zhaga (book 18)

Receptacle

D4i Driver   LEDs   Zhaga-D4i luminaire

Fully compliant to Zhaga Book 18 standard

- Plug and play installation

- No special tool or training needed

- Works with any Zhaga compatible luminaire/ street lighting fixture

# Interoperable – No Vendor Lock-in
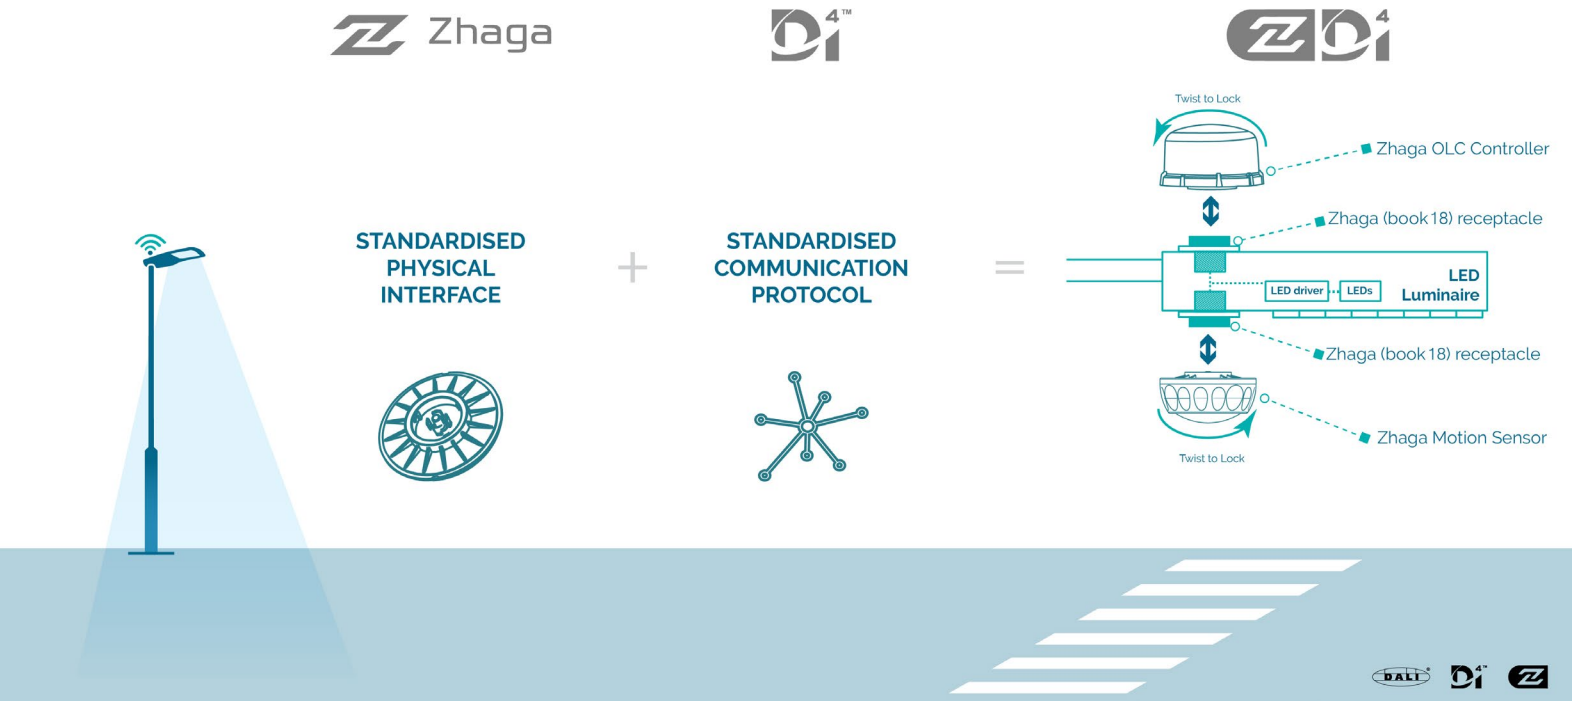

Open architecture enables excellent interoperability

- Select any Zhaga street light fixture of your choice

- Use multiple vendors in a single project

- Integrate any D4i or LSI based motions sensors

Advanced Street Light Health Monitoring Data
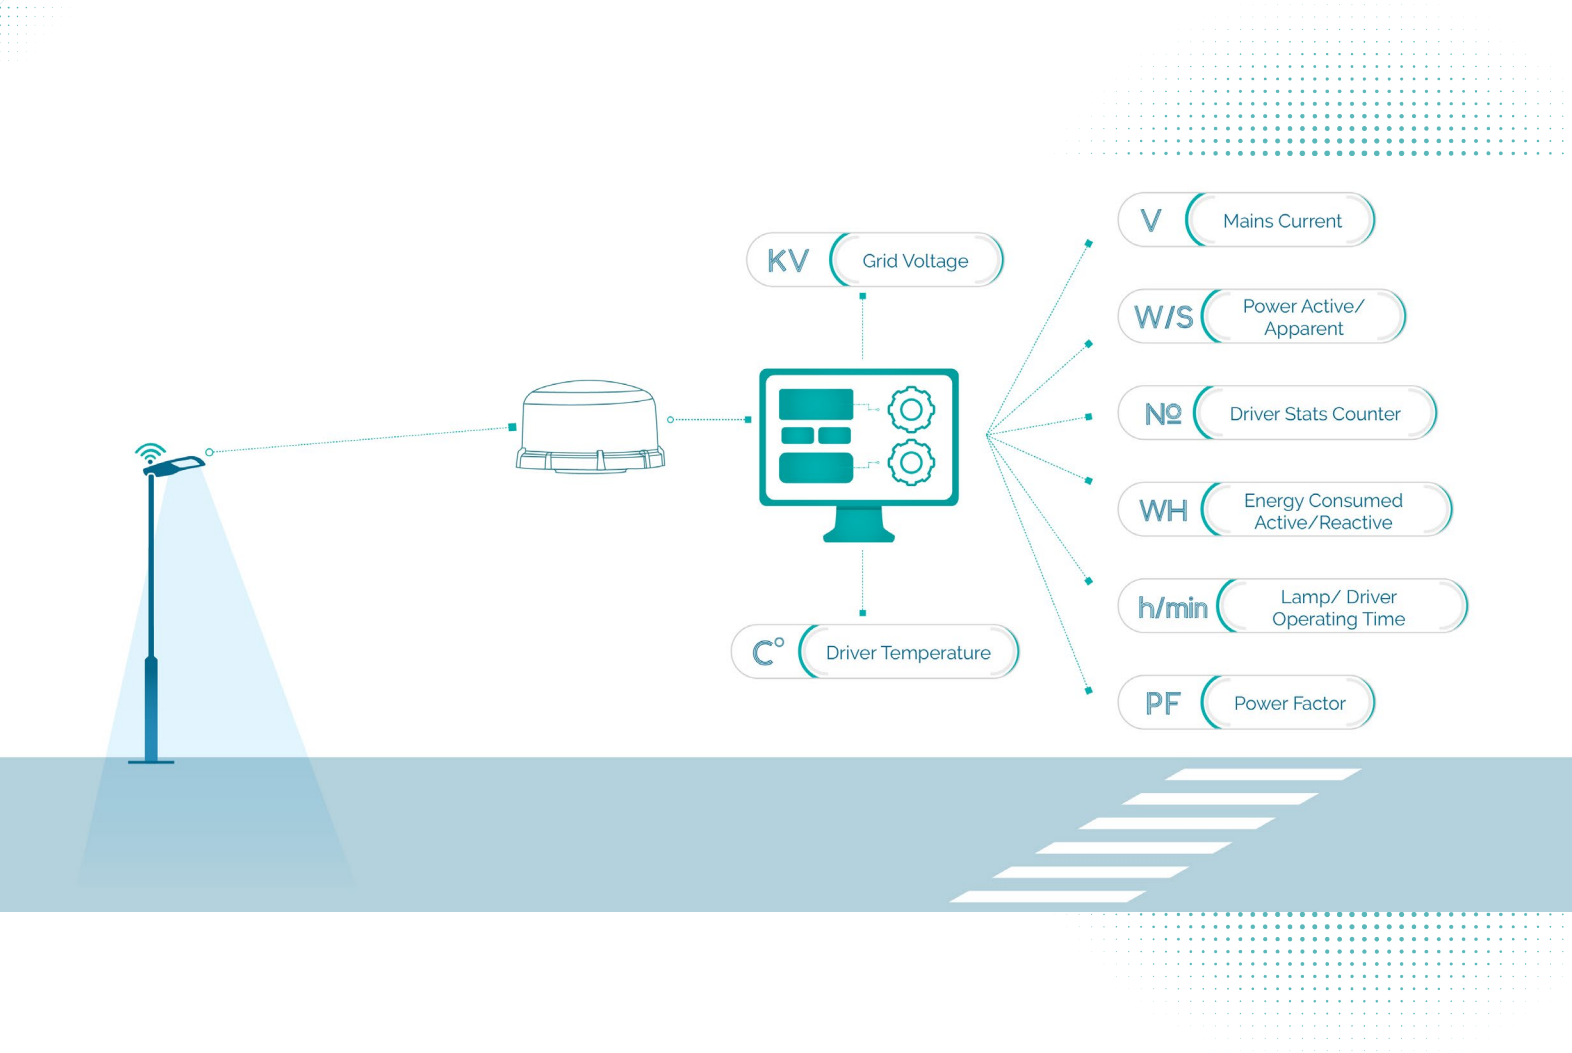

## Achieve Predictive Maintenance

- Pairing Smart D4i Driver delivers advance luminaire, driver and power-grid data

- Data set includes driver temperature, input voltage/ power/ current/ power factor, etc.

- Notifications, alerts and error logs

Open Standards

Open APIs

Open APIs
Smart City Systems

Built on Open Standards & APIs

- Works with a range of IoT and Smart City systems

- Selected examples:
  - Cisco Kinetics
  - Siemens Atos
 - SixData luxData.light
  - Osram LumIdent

On-Demand Adaptive Lighting
Connects with any DALI D4i and LSI-based motion sensor

- Light-on-demand based on presence detection

- Suitable for pedestrian, bicyclist and road traffic

- Motion sensors improve public safety perception

Safe Circle-of-Light – Automatic Neighbour Trigger

OpenSky IoT Plus

Motion Sensor

Neighbour Trigger
Experience light-on-demand

- Road users drive through a safe circle-of-light (OpenSky IoT Plus)

- Motion sensing enhances public safety perception

- Achieves 60% - 90% energy savings

- Significant reduction in carbon footprint and light pollution

- Benefits local flora and fauna

Visualise Road Usage with Heatmaps

Understand how citizens use roads

- Pairing motion sensors helps generate heatmaps to:
  - Measure people's movement
  - Identify areas and spots that are popular at different times
  - Spot trends and patterns to adjust street lighting levels based on road usage data

TVILIGHT

Features to Improve Day-to-Day Operations...

Automatic

Integrated photocell (twilight sensor) enables streetlight switching based on the naturally available ambient light

Interoperable

Supports multiple dimming protocols (0-10V, DALI, DALI 2, SR, D4I and ANSI C137.4)

Timely Notifications

Receive all updates about your street lighting infrastructure via email and CityManager platform

Features to Improve Day-to-Day Operations...

Pole Knock-Down Alert

In-built tilt sensor sends an automatic alert if the street pole suffers damage due to car crash

Over-the-Air Updates

Thanks to the faster communication with the device, software updates take place in matter of minutes

IP66 + UV Stabilised

IP66 and UV stabilised housing protects the device in the harsh environment and ensures prolonged life

Business Case – Dortmund, Germany

Overview:

- Location: Germany
- Client: City of Dortmund
- Status: 44.000 full operational smart street lights

Major Results & Benefits:

- Energy Savings: An average 65% every night
- CO_2 Reduction: 1757 tonnes in 6 months
- Enhanced Safety: Improved public and traffic safety with precise illumination
- Cost Efficiency: Reduced maintenance costs through proactive fault alerts
- Smart City Ready: Open standards and APIs allow easy integration and future expansion

Partners:

TRILUX SIMPLIFY YOUR LIGHT. LUNUX DEW21 SPIE
"I can wholeheartedly recommend this lighting system to other cities," **Mr. David Obenaus, DEW21**

"The system fully meets and exceeds the original vision and requirements," **Mr. Meinolf Pflug, Dortmund Civil Engineering Office**
Business Case – Olympia Odos, Greece

Overview:

- Location: Greece

- Client: Olympia Odos

- Status: 215 km highway, connecting Athens and Patras, has smart AI-driven street lights deployed which adapt illumination based predicted traffic and weather conditions

Major Results & Benefits:

- Energy Savings: 54% energy savings

- CO2 Reduction: Over 1702 tonnes of CO2 reduced in the last 6 months

- Enhanced Safety: Artificial intelligence ensure optimal light levels based on predicted traffic and weather conditions, boosting safety for drivers

- Cost Efficiency: Remote monitoring and control capabilities from the Tvilight's light management platform enabled efficient maintenance practices, ensuring reduced downtime and overall associated costs

- Future Ready: Open API-based solution opens endless possibilities for the client to integrate various IoT systems to make the motorway safe and modern yet sustainable

Partners:

sielight   VINCI

"The openness and flexibility of the system proved to be very beneficial, allowing us to integrate artificial intelligence for adaptive lighting," **Olympia Odos S.A.**

Business Case – Dutch Railways

Overview:

- Location: the Netherlands
- Client: ProRail
- Status: 10.000 platform lights, across 400 stations are equipped with motion sensors and are fully operational

Major Results & Benefits:

- Energy Savings: Over 40% energy savings
- CO2 Reduction: Nearly 94 tonnes in 6 months
- Enhanced Safety: Adaptive lighting increases safety for passengers and railway personnel
- Reduced Light Pollution: Positive impact on nearby residents and wildlife
- Cost Efficiency: Proactive maintenance with remote monitoring reduces costs

Partners:

"We wanted to achieve a few things – lowering energy usage and lighting pollution while ensuring public safety. Tvilight's solution combined this beautifully," **Eelco Krakau, Contract Manager, Prorail**

"Motion sensor street lighting aligns perfectly with our sustainability goals. It's been instrumental in reducing our carbon footprint, making our stations eco-friendly." **Maurits Pigeaud, Systems Engineer**

Business Case – Münster, Germany

Overview:

- Location: Germany
- Client: City of Münster
- Status: All street lights on a 27 km bicycle path are equipped with motion sensors and are fully operational

Major Results & Benefits:

- Energy Savings: Over 70% reduction in energy usage
- CO2 Reduction: Significant decrease in carbon footprint
- Enhanced Safety: Optimal illumination for cyclists and pedestrians, when and where needed
- Environmental Impact: Reduced light pollution, benefitting nocturnal ecosystem
- Recognition: Winner of German Bicycle Prize for Infrastructure

Partners:

LUNUX
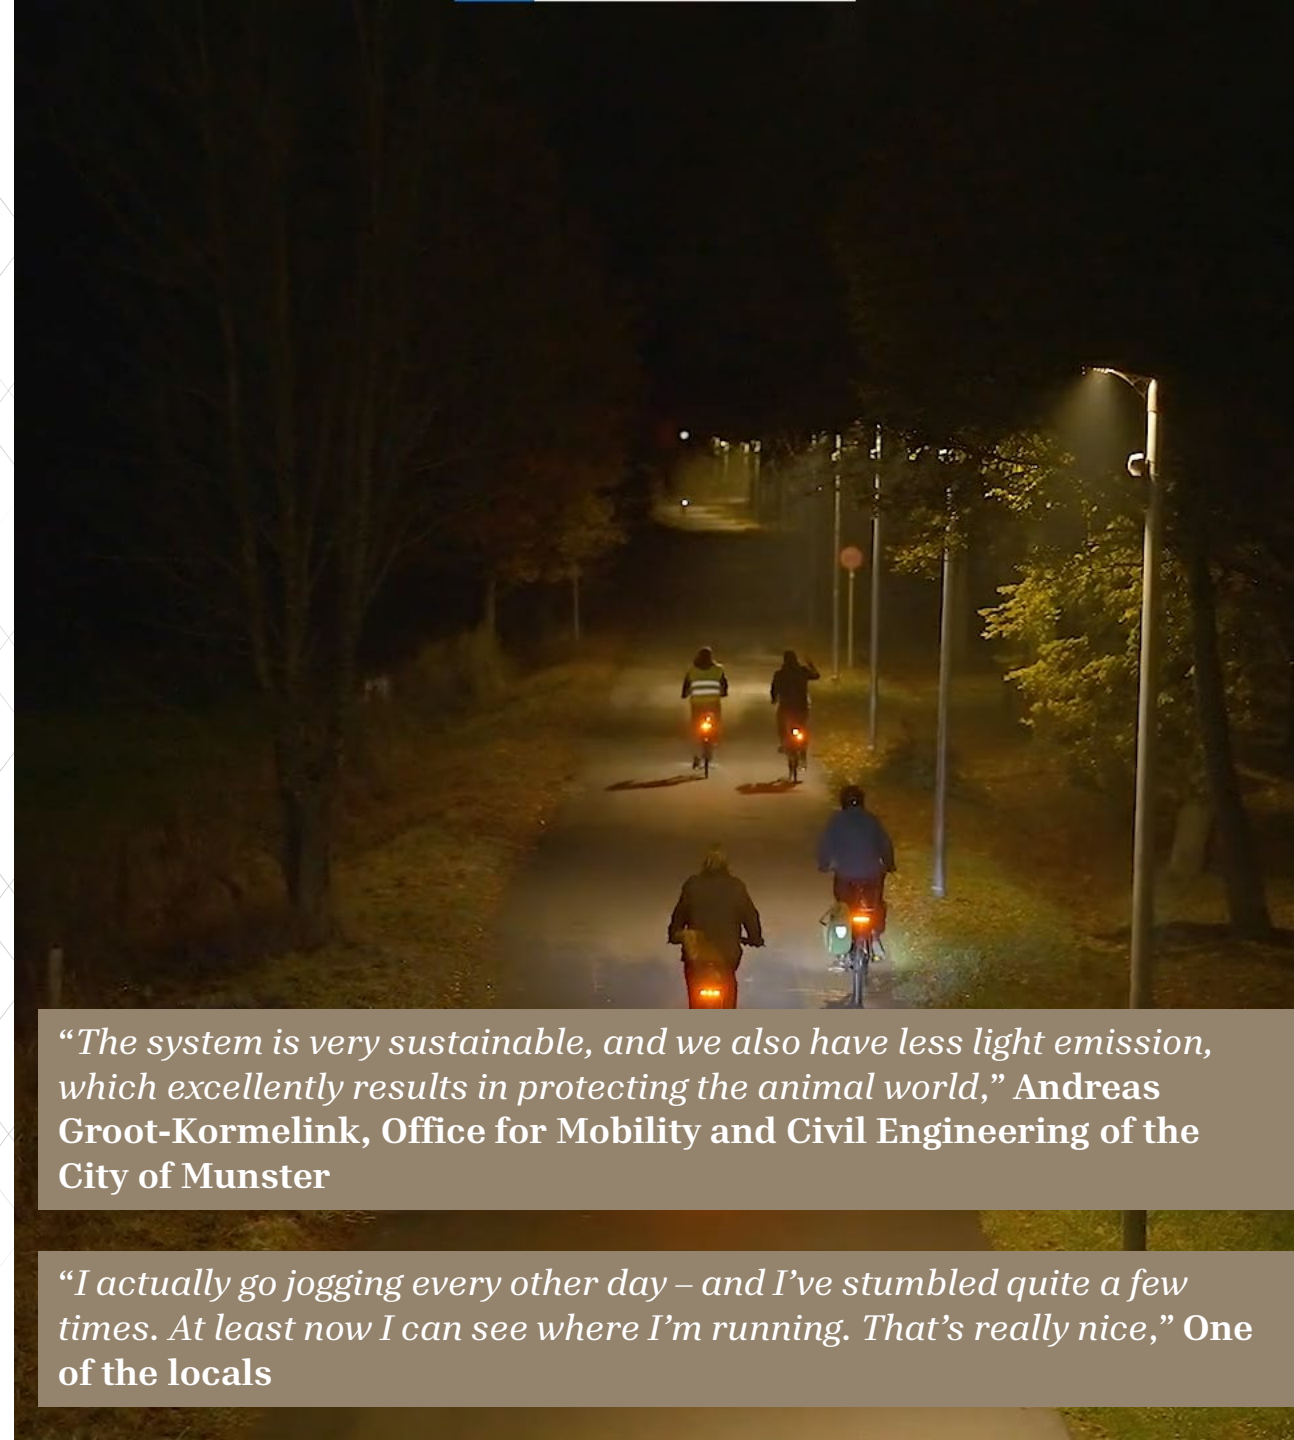

"The system is very sustainable, and we also have less light emission, which excellently results in protecting the animal world," **Andreas Groot-Kormelink, Office for Mobility and Civil Engineering of the City of Munster**

"I actually go jogging every other day – and I've stumbled quite a few times. At least now I can see where I'm running. That's really nice," **One of the locals**

Business Case – Helmond, the Netherlands

Overview:

- Location: the Netherlands

- Client: Municipality of Helmond

- Status: 10.000 controllers and sensors across main and secondary roads, pedestrian and bicycle paths, residential areas, university and automotive campuses are deployed and fully functional

Major Results & Benefits:

- Energy Savings: Nearly 70% energy savings

- CO_2 Reduction: Over 310 tonnes of CO_2 reduced in the last 6 months

- Enhanced Safety: Improved overall safety with optimal illumination

- Environmental Impact: Reduced light pollution, benefitting citizens as well as nocturnal ecosystem

- Smart City Ready: Open API enables the city to incorporate diverse IoT applications to support smart city needs

- Cost Efficiency: Reduction in operating and maintenance costs thanks to precise control over lighting infrastructure and automatic fault notifications and luminaire health data

Partners:

heijmans

"Motion-sensing street lighting helps, because it allows to have just as much or as little light as needed. With Tvilight, Helmond preserves citizen safety with maximum energy savings," **Alfred Groote, Public Lighting Manager at the Municipality of Helmond**

Business Case – Chattogram, Bangladesh

Overview:

- Location: Bangladesh
- Client: Chattogram City Corporation
- Status: 4.800 smart controllers operational and potential project extension for 20.600 light points

Major Results & Benefits:

- Energy Savings: Over 30% energy savings
- CO2 Reduction: Over 90 tonnes of CO2 reduced in the last 6 months
- Enhanced Safety: Smart profiles and built-in ALS sensors ensure the streets remain well-lit always, boosting safety for public
- Cost Efficiency: Reduced maintenance costs thanks to total control over the public lighting infrastructure and proactive fault alerts from the system
- Smart City Ready: Open API-based solution lays a solid foundation the municipality to move towards its Smart City goals

Partners:

Trademajestic Limited

THORN

"With smart street lights that turn ON according to the ambient lighting level, it is a major benefit for the city in terms of improving safety of the Citizens during the overcast days," **Engr. M Mahbub Hussain, Managing Director of Trademajestic Limited**

Business Case – Jaipur, India

Overview:

- Location: India

- Client: Jaipur Development Authority (JDA)

- Status: 7500+ IoT and RF Mesh motion sensor-based smart street lights deployed across the city, including the urban and rural areas

Major Results & Benefits:

- Energy Savings: 55% energy savings

- CO2 Reduction: Over 487.8 tonnes of CO2 reduced in the last 6 months

- Enhanced Safety: The solution ensured consistent illumination, improving safety and deterring unwanted activities

- Cost Efficiency: CityManager and a special request Citizen App from Tvilight, streamed streetlight management, reducing frequent manual inspections and accelerating maintenance response, lowering operational costs

- Future-Proof Investment: Scalable solution enables Jaipur well-prepared for future growth, including total freedom to integrate other smart city applications
Partners:

"Our city is benefiting in every aspect – from safety and security, to easy access to information, to overall improvement of our image and a stepping into the "Smart City" arena.," **Shikhar Agrawal, Government of Rajasthan**
